

Grow longer and straight French Bean Pods with Yara fertilizer program

Standard farmer fertilizer program

Yara fertilizer program makes the difference

Knowledge grows

Want Higher Yields and Better Quality for your French Beans?

Try us!

Benefits of Yara Program

1. Provides complete and balanced nutrition for French beans important for increased marketable yield and quality
2. Promotes quick and stronger crop establishment leading to early harvest
3. Increases number of flowers, converting to more pods per plant with minimal flower abortion
4. Promotes the formation of longer and straight pods that is desired by the market
5. Provides improved plant resistance to pests and diseases hence saving farmers additional application costs of pesticides
